HOW TO MINT THE BORING ELON NFT

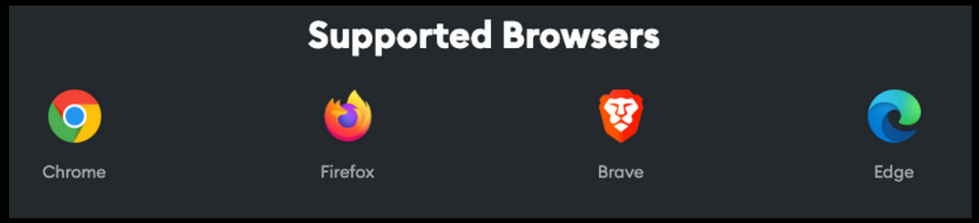
STAGE 1. INSTALL METAMASK

MetaMask is one of the most popular Ethereum (cryptocurrency) wallets. It is accessible as a browser extension, website and phone app.

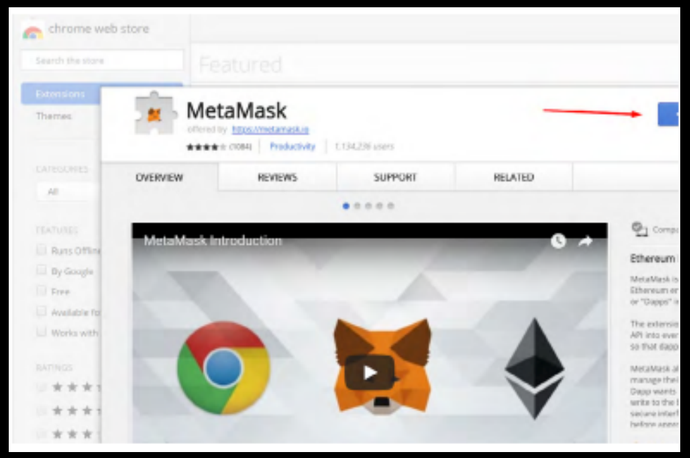
You will need a wallet to store your Ethereum and other tokens, including your NFTs. The extension is free and secure, and it allows web applications to read and interact with the Ethereum blockchain.

Go direct to the MetaMask webpage at https://metamask.io/ to begin your download. Ensure this address appears in your browser.

You can also find MetaMask in the Apple and Android App stores.



Once on the MetaMask website, follow these step by step instructions:
1. Click on Download now.
2. Under the heading ‘Install MetaMask for your Browser’, click Install for Chrome. You may get a pop-up asking if you would like to ‘allow’ the application. Click to continue.
3. You have now been directed to the chrome web store. Click Add to chrome in the top right-hand corner.



4. An Add “MetaMask” box may pop up on your browser:

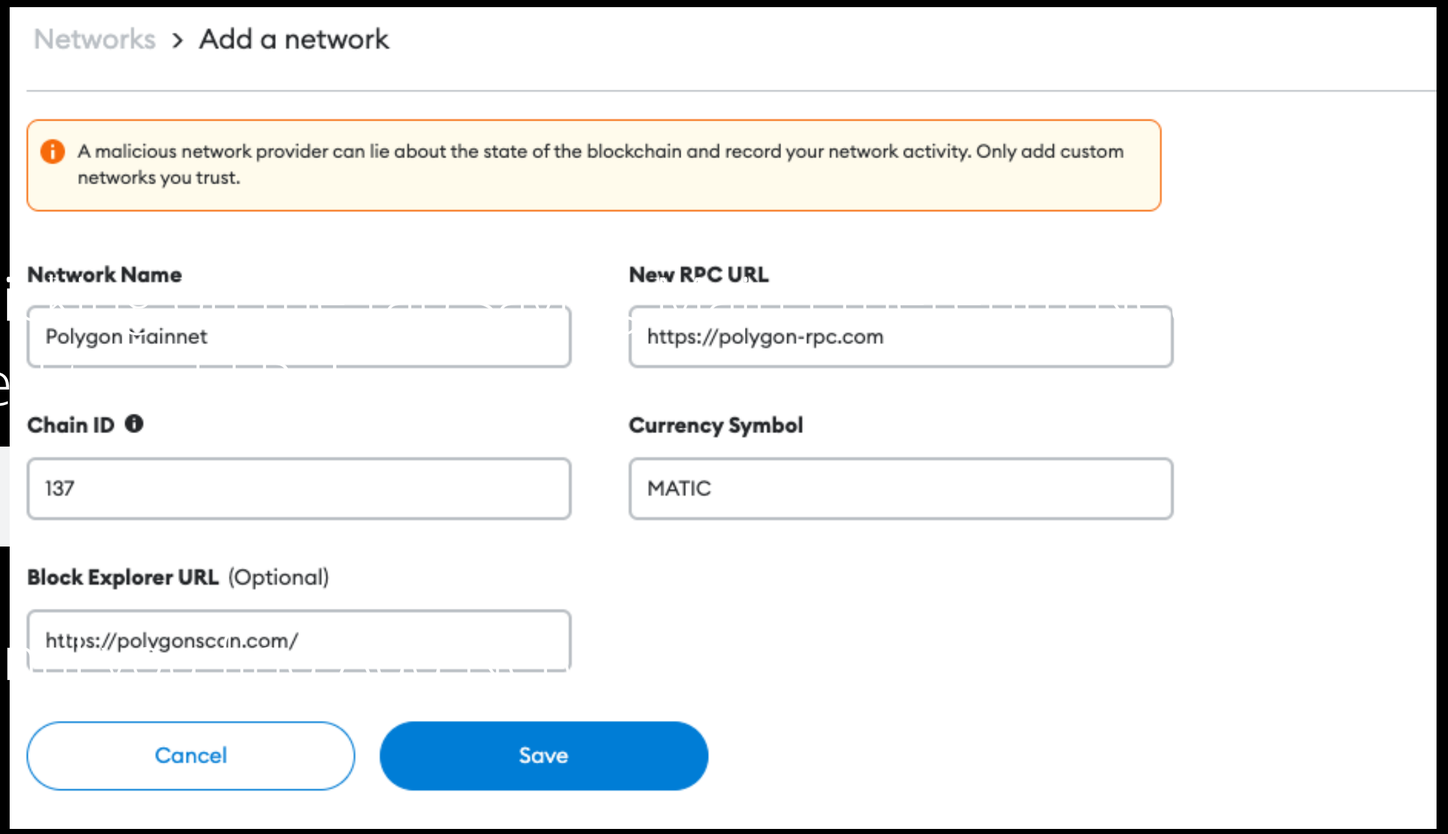
5. Click ‘Add extension’.
NOTE: If the MetaMask fox logo does not appear in your extensions bar, click on the grey puzzle icon, then click the ‘pin’ next to the MetaMask logo. This will pin MetaMask to your extension bar for easy access.

6. The MetaMask fox logo will then appear next to the address bar upon completion of these steps.

STAGE 2. SET UP POLYGON NETWORK IN METAMASK

Switch the connected blockchain by cli
nee

Scroll down u



Click Save.
